DETAILED ACTION

1. This action is responsive to the Applicant's Amendment filed on October 20, 2004.
2. Claims 1 – 4, 6 – 18, 20 and 21 are allowed. Claims 5 and 19 are cancelled.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance:

Prior art of record, Claussen, taken either singly and/or in combination, does not teach or disclose a method as recited in independent claims 1, a system as recited in claim 12, a computer program product as recited in claim 18, or a signal transmitted over a network as recited in claim 21 with the following feature:

During parsing of an XML input stream an object mapped to a tag object is found and executed **before** the input stream is entirely parsed and the tree representation is entirely built.

The closest prior art is Claussen:

Claussen, U.S. Patent 6,675,354, which executes JAVA objects mapped to XML tags, but the objects are executed after the parsing, and the tree representation of the input stream is already built. The methods of the JAVA objects are not executed during the parsing phase.

Thus all remaining dependent claims 2 – 4, 6 – 11; 13 – 17; and 20 are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
